

## **COMPANY OVERVIEW**

Sierra Systems is an exciting, dynamic and growing professional services company. Founded in 1966, we provide management consulting, systems implementation and managed services to an enviable list of clients in a wide range of industries including state, provincial and local government, health, justice and energy. We are proud to employ approximately 1,000 employees in 13 markets including: Calgary, Edmonton, Halifax, Ottawa, Regina, Toronto, Vancouver, Victoria, and Winnipeg in Canada, as well as Austin, Los Angeles, Olympia, and Seattle in the US. For more information, please visit [www.sierrasystems.com](http://www.sierrasystems.com).

## **SENIOR BUSINESS ANALYST – PUBLIC HEALTH SYSTEMS (Calgary, AB)**

Sierra Systems in Calgary is currently seeking several Senior Business Analysts with experience in the Public Health domain. Key experience includes roles that demonstrate how an understanding of clinical operations within a public health setting has been gained.

### **KEY AREAS OF RESPONSIBILITY**

Conduct needs assessments with clients to validate business technology requirements;

- Promote interoperability of business and technology, acting as the bridge between the business objectives and the technology requirements
- Lead client groups to conceptualize processes to apply information technology as a strategic asset, as it applies to business
- Determine and/or validate business requirements through research, facilitation and/or analysis
- Document requirements by using different techniques such as Use Cases, Swim Lane Diagrams and/or Process Modeling
- Facilitate the development/creation of current and future state business process, organizational, and high-level technology architecture models related to management of Communicable Disease and Outbreaks
- Develop detailed business and technical specifications, which could include projected costs
- Contribute to the creation of test plans; developing test cases and scripts for Functional Testing
- Contribute to the creation of training plans and downtime procedures
- Lead other business analysts and assume responsibility for quality of deliverables

### **PROFESSIONAL QUALIFICATIONS & EXPERIENCE**

- Minimum of 9 years of business analysis experience
- Minimum 5 Years with Public Health experience: Understanding of cross-continuum aspects of the health system and direct experience in clinical settings and operations
- Demonstrated experience and ability to work both within a team environment and independently
- Demonstrated ability to work effectively with health care stakeholders and specifically with community health clinicians.
